

**Ruxandra L. Costea** is currently with the Department of Electrical Engineering, University of Bucharest where she teaches electrical engineering fundamentals and neural networks inspired circuits. Her current research interests include neural network dynamics, nonlinear analog circuits and systems, biologically inspired computational circuits and subthreshold MOS circuits. All with applications to analog signal and image processing, filters, pattern recognition and sensors. Dr. Costea received the B.Sc. degree in electronics and telecommunication engineering, (2000), the M.Sc degree in electrical engineering (2001), and the PhD (2007) all from the Polytechnic University of Bucharest, Romania. Her Ph.D. thesis dealt with time prediction for recurrent neural networks and applications to clock design for winner take all selectors.

Dr. Costea is a research grant winner of the European Union funded projects (2010 and 2011), as well as other national grants (2008, 2010). She has also received doctoral and postdoctoral training grants at the Universitat Politècnica de Catalunya – Barcelona, Spain, Jyväskylä University – Finland, University of Auckland – New Zealand. She is a local organizer of Romanian electrical engineering conferences (since 2001, advisor for master's thesis, and tutor of freshman students. Dr. Costea is an IEEE member, an active reviewer for IEEE Transactions on Neural Networks, reviewer for neural networks at various international conferences (IWACI 2010, ISNN 2010) and served as session chair at ICONIP 2008.
