

Chai Wah Wu (F-IEEE) received the B.S. and B. A. degrees in Computer Engineering and Cognitive Science from Lehigh University, and the M. A. degree in Mathematics and M.S. and Ph. D. degrees in Electrical Engineering from the University of California at Berkeley. He is currently Manager of the Intelligent Energy Management Group at IBM T.J. Watson Research Center in New York. His research interests include digital halftoning, synchronization of chaos, image watermarking, nonlinear dynamics, complex networks, algebraic graph theory and multimedia security. He has published over 200 papers and is the inventor on 57 patents. He has served on the technical program committees of numerous international conferences. He is the recipient of several Technical Accomplishment and Outstanding Technical Achievement awards from IBM Research. Dr. Wu is the Co-Chair of CNNA 2010 and 2012 and has served as associate editor of IEEE TCAS-I and TCAS-II, and has chaired the IEEE CAS TC on Cellular Nanoscale Networks and Array Computing. He has been an IEEE CAS Distinguished Lecturer and a member of the Board of Governors of IEEE CAS. He was elected Fellow of the IEEE in 2001 and is currently an IEEE EAB ABET Program Evaluator.
