

Myeong-Eun Hwang received the B.S. degree in electronic engineering from Hanyang University, Seoul, Korea, in 1992, the M.S. degree in electrical and electronic engineering from the Korea Advanced Institute of Science and Technology, Daejeon, Korea, in 1996, and the Ph.D. degree in electrical and computer engineering from Purdue University, West Lafayette, IN, in 2007.

From 1995 to 2001, he was a Senior Research Engineer with LG Semiconductor and Hyundai Electronics, Seoul, where he was engaged in several projects on embedded microcontroller units and 16-bit digital signal processing- core designs. In 1997, he was a Research Engineer with LG Semiconductor America and the Chromatic Research Center, San Jose, CA, where he was involved in the evaluation of MPACT media processors. In summer 2004, he was an Intern with Qualcomm, San Diego, CA, where he was working on interconnect and memory characterization in nanometer technology. In 2008, he worked for Intel, Hillsboro, OR, as an Engineer in enhanced-performance central-processing-unit design. Since October 2010, he has been with Samsung Electronics, Seoul, as a Principle Engineer. His research interests include the characterization of nanoelectronics and low-power high-performance integrated devices, circuits, and architecture design under process variations in nanometer technology.
